

MARKER BUOY ARD-1250

Arudhra Technologies manufactures Coastal Marker Buoys to mark the edges of navigable channels. ARD 1250 buoys are used to warn vessels of potential hazards like shoals, rocks, or wrecks. These buoys help protect environmentally sensitive areas by marking off specific zones.

Key Features :

-  **Boundary Marking:** Define boundaries and alert vessels to potential hazards.
-  **Bridges:** To indicate to fishermen areas of low depth.
-  **Manpower for Deployment of Buoy**

USED IN:

- **Marking Hazard:** Indicate underwater obstacles, e.g., rocks or shallow areas.
- **Demarcating Boundaries:** Define the limits of swimming, fishing, or restricted areas.

Customers:
